In An Urban and Suburban World

Lesson #1 ... A Cautionary Tale

The Disclaimers, Legal Stuff and Butt-Covering Section:

This is but one small section of a complete action plan for building solar panels dirt cheap. Which is one small section of a course on going off the grid in Urban/Suburban America. You can learn how to

- **Grow your own food year around, no matter where you live.**
- **Slash your energy and living expenses by 50% or more.**
- **Create your own fuel**
- **Finding economical shelter**
- **Alternative methods of (Legally) making money**
- **How to live anonymously**

Introduction

The most important thing to take away from this lesson is..

Before attempting to build a solar system for your entire house, take my course "Home Energy Made Easy" Go here: <http://Off-Grid-Living.com> I'll give it to you for free for being a member of this course. Understanding the concepts in that course will save \$1000's of dollars when you go to build your system.

Why? It's not because I'm trying to make as much money as possible. I've intentionally left the price low to make it as easy as possible for everyone.

The reason is 70% to 90% of energy savings is in energy conservation. What do I mean by that? I mean, that if you start building solar panels now at your current rate of energy usage, you'll spend way more than is necessary. You'll need to build more panels, you'll spend way more than is necessary on parts, and you'll need a much bigger system than is necessary.

Also to make sure I get the legal mumbo-jumbo in there, be sure to adhere to all local laws, as well as practice safety.
